SUMMARY

Engineering Manager and Front End Engineer with 12+ years of development and 5+ years of leadership experience. Proven track record of scaling high-performing teams, delivering AI-powered products, and driving cross-functional alignment. Expert in modern front-end stacks, including React and TypeScript, with a focus on technical excellence, agile process optimization, and mentorship. Enthusiastic about building AI-powered tooling to accelerate team performance.

SKILLS

- **Front End Engineering:** React, TypeScript, JavaScript (ES6+), HTML5, CSS3/SASS, Component Library Systems, UI/UX Implementation, AI Coding Workflows & Tooling, REST APIs, Micro-frontends, Responsive Web Design, Performance Optimization, Webpack, Git, Automated Testing.
- **People Management & Leadership:** Technical Leadership, Direct People Management, Mentorship & Career Coaching, Talent Acquisition & Hiring, Agile/Scrum Methodologies, Cross-Functional Strategy, Product & Design Alignment, Stakeholder Management, Team Velocity & Process Optimization.

PROFESSIONAL EXPERIENCE

Reddit — Remote

Engineering Manager — Ad Creative Management Team

January 2025 – September 2025

- Led a full-stack engineering team responsible for building high-scale advertiser tools that automate ad creation.
- Partnered closely with Machine Learning teams to architect and ship generative AI-powered features, including ad-context-aware AI headline generation.
- Guided front-end technical strategy, ensuring modern UI standards, architectural scalability, and seamless integration with complex backend services.
- Collaborated directly with Product Management and UI Design stakeholders to align on strategic product roadmaps, project timelines, and high-impact quarterly OKRs.
- Drove developer environment quality initiatives in partnership with peer managers, improving developer productivity, tooling efficiency, and CI/CD deployment reliability.
- Screened, interviewed, and successfully hired full-stack engineers and contractors, establishing rigorous technical standards and smooth onboarding processes.

Amazon — Seattle, WA

Engineering Manager — Amazon Photos Sharing Team

September 2020 – November 2024

- Managed a team of 9 full-stack engineers in the development, delivery, and operation of mobile app features and backend services for Amazon Photos.
- Directly mentored engineers at all career levels, promoting professional skill development, supporting promo pathways, and establishing a culture of technical craftsmanship.
- Collaborated closely with UX designers and product managers to align technical design and implementation with customer experience goals, accessibility standards, and visual brand identity.
- Implemented agile practices (sprint planning, backlog refinement, daily stand-ups, retrospectives) to streamline development velocity, team communication, and feature delivery predictability.
- Oversaw project architecture and design reviews, ensuring strict adherence to coding standards, operational scalability, maintainability, and high operational excellence.
- Led talent management efforts, including recruiting, interviewing, hiring, performance evaluation, and onboarding top engineering talent.

Amazon — Seattle, WA

Front End Engineer — Amazon Photos & Amazon Go Store

June 2015 – September 2020

- Architected and built responsive web applications using React, TypeScript, HTML, CSS/SASS, JavaScript (ES6+), and Java backends for Amazon Photos and Amazon Go Store initiatives.
- Developed and maintained robust design and component library systems, establishing standardized UI components and patterns that elevated visual consistency across web offerings.
- Collaborated daily with UI/UX designers, PMs, and QA teams to translate complex product specs into performant, polished interfaces while adhering to technical constraints.
- Conducted thorough peer code reviews and mentored junior developers on modern front-end best practices, web accessibility, and clean code principles.
- Active participant in tier-1 on-call rotations, quickly diagnosing and mitigating production incidents to ensure high application availability and operational health.

Nordstrom — Seattle, WA

Interactive Developer

April 2012 – December 2014

- Built high-profile digital advertising experiences and interactive web features using HTML, CSS, JavaScript, and custom CMS extensions in close partnership with design teams.

Fairhaven Health — Redmond, WA

Web Designer / Developer

January 2010 – April 2012

- Designed and developed consumer-facing e-commerce websites, landing pages, and email marketing campaigns using HTML, CSS, JavaScript, and Adobe Creative Suite.

EDUCATION

Willamette University — Salem, OR

Bachelor of Arts (BA) in Studio Arts | Minors in Computer Science and Molecular Biology
